

macOS HMS Client v6.8 Genie Configuration

A guide to completing the installation of HMS Client v6.8 for Genie sites

Genie modifies the configuration file for HMS Client during the installation process. This breaks the installation. Running this script will remedy the changes Genie makes to the configuration file.

Welcome to completing the installation of HMS Client v6.8 for Genie sites.

Genie modifies the configuration file for HMS Client during the installation process. This breaks the installation. Running this script will remedy the changes Genie makes to the configuration file.

Please follow these instructions **AFTER** installing HMS Client v6.8 on your system.

This script modifies the hms_config.xml file before importing it into Genie.

Step 1 & 2:

Copying config and script files

Step 3, 4 & 5:

Open terminal application and run 2 commands

Step 6 & 7:

Run the script and import configuration file into Genie

Step 8:

Select the configuration file to import into Genie

Step 9:

Setup complete

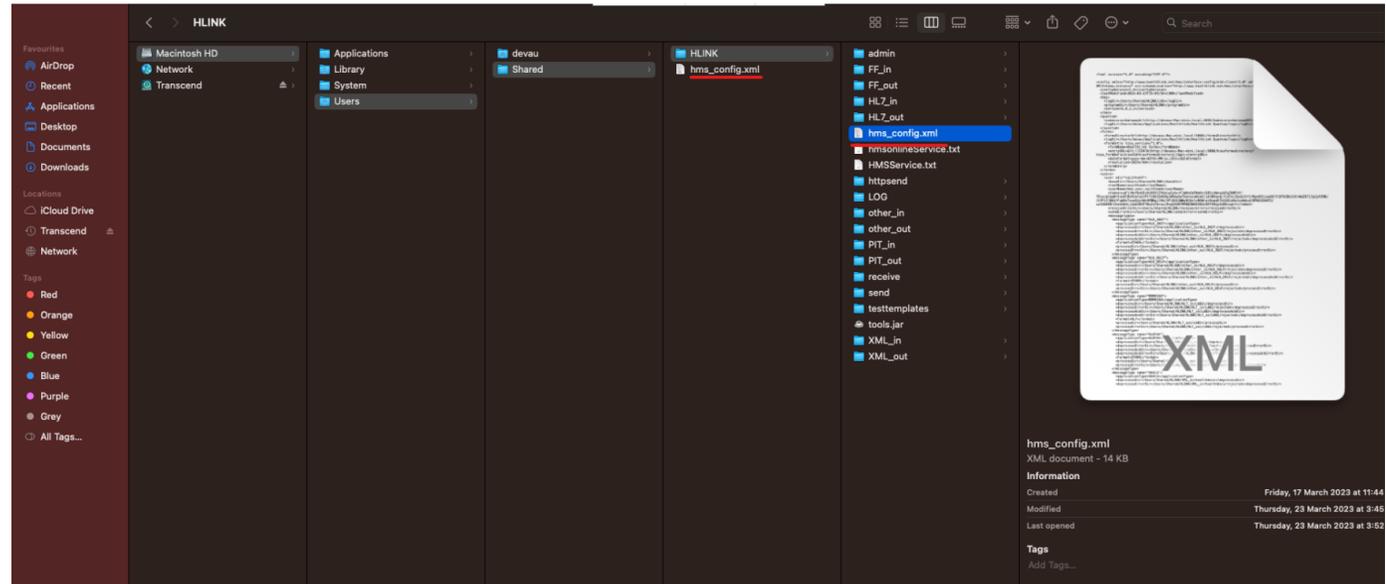

HealthLink Technical Support

Step 1:

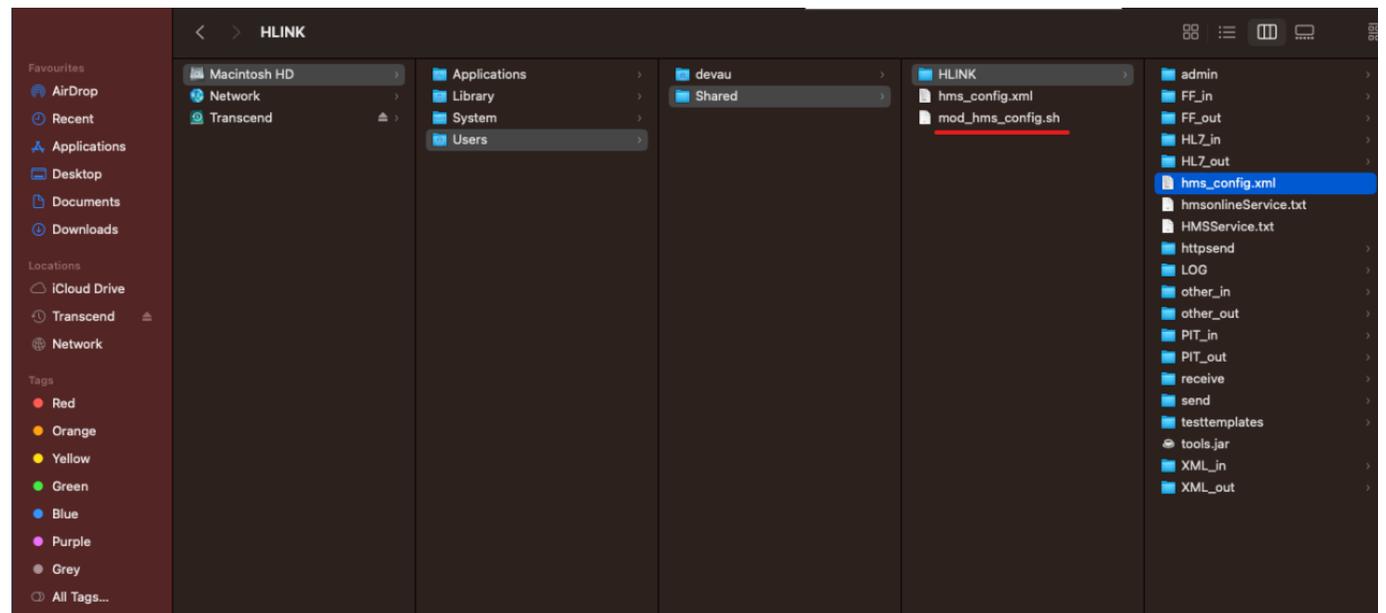

Copy the hms_config.xml from /Users/Shared/HLINK to /Users/Shared

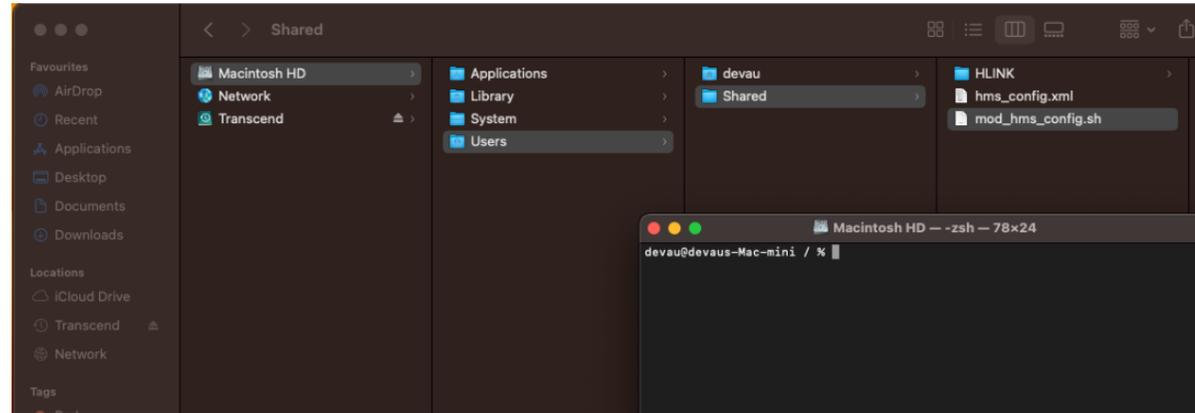

Step 2:

Copy the 'mod_hms_config.sh' to /Users/Shared

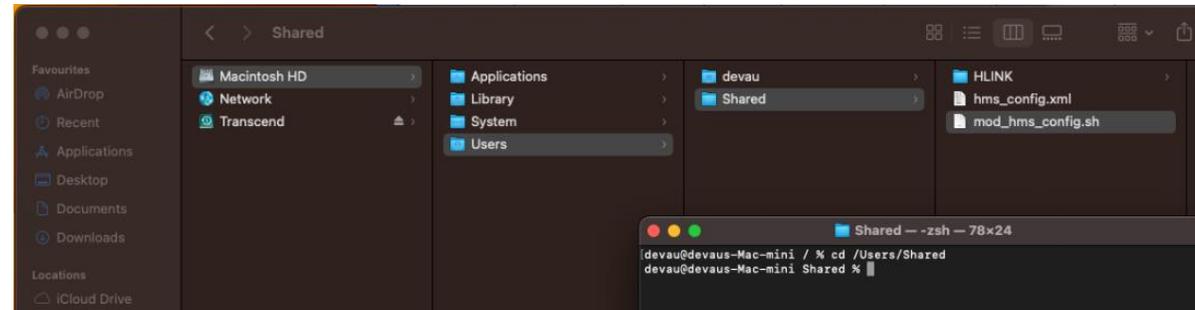

This script file is downloaded from HealthLink's website along with this Guide.

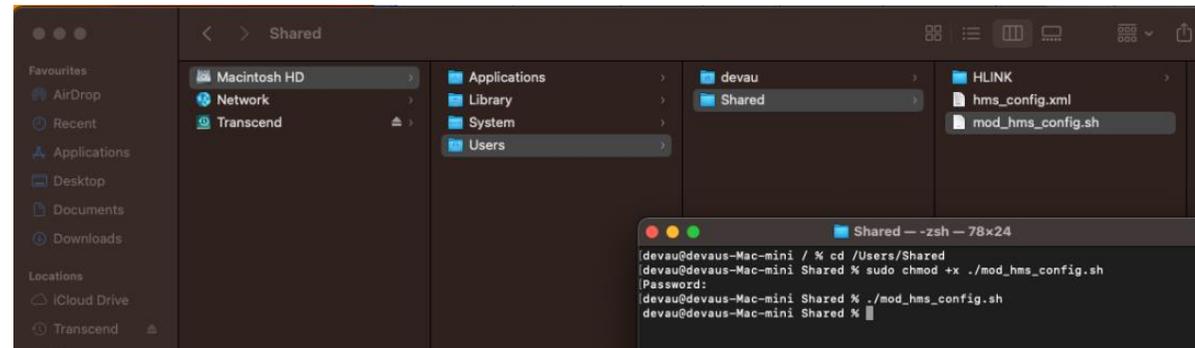

Step 3:
Open the terminal application

Step 4:
Run the following command:
`cd /Users/Shared`

Step 5:
run the following command:
`sudo chmod +x`
`./mod_hms_config.sh`

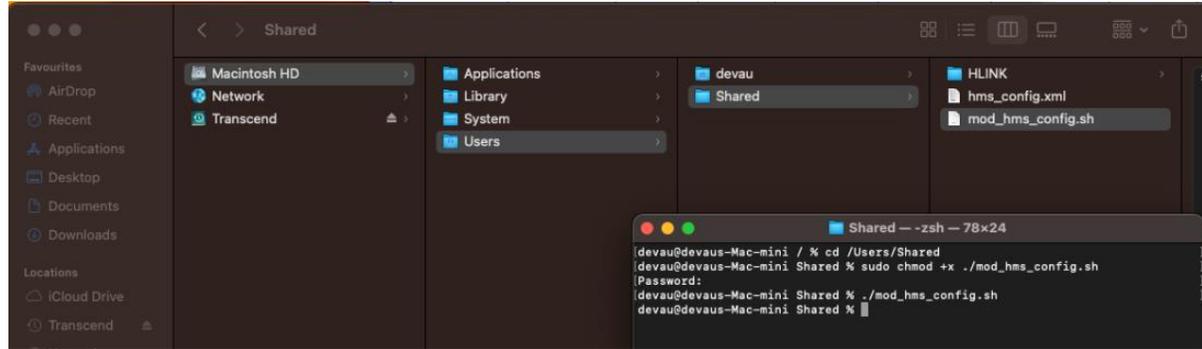

Give the admin password if requested

Step 6:

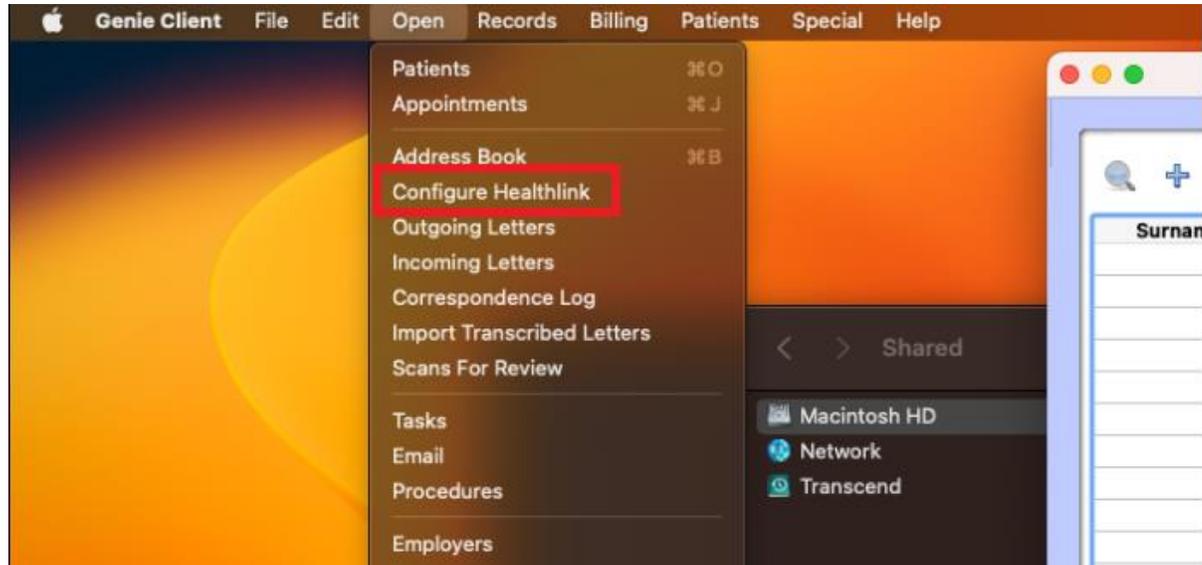

run the following command:
`./mod_hms_config.sh`

This will modify the path values of the hms_config.xml in the /Users/Shared folder, leaving the original file in the HLINK folder unaffected.

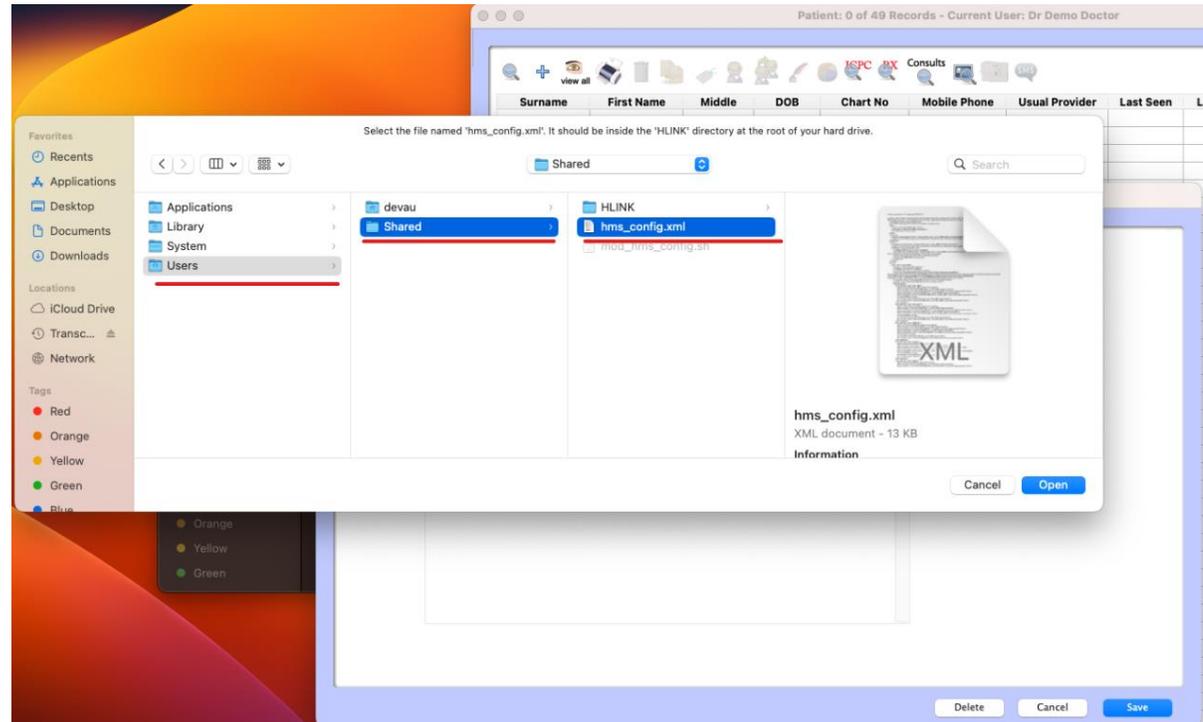

Step 7:

Import the modified hms_config.xml from the /Users/Shared folder into Genie

Step 8:
Configure Genie by selecting
/Users/Shared/hms_config.xml file to import

Step 9: Setup complete

The screenshot shows a configuration window for HealthLink. The fields are filled as follows:

- Name: Healthlink
- Identifier: sajithsmd
- Computer: devaus Mac mini (with a dropdown arrow and the text "Select the computer on which this carrier is installed")
- Config File: Macintosh HD:Users:Shared:hms_config.xml (with "Browse..." and "View" buttons)

Below the Config File field, there is explanatory text:

This the path to the file named 'hms_config.xml'.
This is usually found in the 'HLINK' directory at the root of your hard drive.
e.g. "Macintosh HD:HLINK:hms_config.xml"
or "C:\HLINK\hms_config.xml"

If you have HealthLink installed on the server, or another computer on your network, you will need to select that computer using the dropdown menu above, and then type the correct pathway to this file.

If HealthLink is installed on this computer, just use the 'Browse...' button to select it.

A "Test" button is located to the left of a text box containing the following information:

```
HealthLink is installed
EDI: sajithsmd
Lab In: Macintosh HD:Users:Shared:HLINK:HL7_in:LAB2:
Lab Out: Macintosh HD:Users:Shared:HLINK:HL7_out:LAB2:
Letters In: Macintosh HD:Users:Shared:HLINK:HL7_in:RSDAU:
Letters Out: Macintosh HD:Users:Shared:HLINK:HL7_out:RSDAU:
CDA Out: Macintosh HD:Users:Shared:HLINK:HL7_out:LAB2:
Secure electronic forms: Available
```

At the bottom right of the window, there are three buttons: "Delete", "Cancel", and "Save".
